

Instructions

DIRECTIONS FOR USE:

Ensure pool water is properly balanced and chlorine level is below 5ppm.

This product may be used with alternative sanitizing systems such as salt chlorine generators, biguanide and bromine pools.

1. Shake the bottle well (contents may settle).
2. Weekly, add 1 capful per 10,000 gallons of pool water through the skimmer with the circulation system running.
3. Do not shock the pool for at least 24 hours after adding this product.
