

EOS O₃TM

ENHANCED OZONE SYSTEM

BREATHE EASY, USE LESS CHEMICAL SANITIZER, AND WORRY LESS WITH EOS O₃TM.

The EOS O₃TM (Enhanced Ozone System) is a revolutionary water purification system that is up to twice as effective at oxidizing out impurities, without the negative effects of excess ozone gas. This unique 3-part system generates as much as 2 times the amount of ozone as standard systems*, charges spa water with O₃ more effectively, sanitizes spa water better, and destructs nearly all of the residual O₃ gas. EOS has been third party validated to kill 99.9% of the microorganisms found in spas.

**Compared to standard WellSpring High Output Ozone system.*

High Power
Ozone Generator

Mixing Chamber

O₃ Filter

THE EOS O₃TM System works in 3 steps:

- ◆ Ozone is generated using corona discharge technology.
- ◆ Free ozone is mixed with spa water sanitizing and oxidizing out impurities.
- ◆ Excess O₃ gas is filtered out as water is returned to the spa.

SPECS:

Ozone Output: 100 mg/hr @880ppm (2.0cfh)

Voltage: 120/240V, 50/60 Hz,

Power Consumption: 12 Watts

Power Indicator: LED indicator for ozone generator operation.

Contact Tank: EOS Mixing Vessel maximizes ozone contact and removes undissolved O₃ gas.

Destruct Unit: EOS O₃ destruct unit uses the power of activated carbon to remove any excess O₃ gas.

Available as a factory-installed option on all models of Bullfrog Spas 2018 and later.
