

BULLFROG SPAS CLOUD CONTROL™ 2

You can rest easy knowing that control of your spa is just a few clicks away no matter how far you are from home.

With CloudControl 2 and the intuitive smartphone app, you will be able to monitor and control your spa as long as you have a WiFi or digital cellular signal.

Start the spa, turn on lights, change temperature, and adjust pump and filtration settings from your smartphone or tablet—anytime, anywhere.

The new and improved CloudControl 2 transmitters now provide enhanced connection stability between the spa and your router. On the updated CloudControl 2 app, setup has been simplified and now includes both Alexa and Google Home integration.

CloudControl 2 is available for all Bullfrog Spa models. Ask your local Bullfrog Spas Dealer for details.
